

# JobSpy API Documentation

## Overview

`python-jobsby` is a Python package that scrapes job postings from multiple job boards including LinkedIn, Indeed, Glassdoor, Google, and ZipRecruiter simultaneously. It aggregates the job postings into a dataframe and supports the use of proxies to bypass blocking.

## Installation

To install the package, run:

```
pip install -U python-jobsby
```

## Features

- **Multi-site scraping:** Scrapes job postings from LinkedIn, Indeed, Glassdoor, Google, and ZipRecruiter.
- **Data aggregation:** Aggregates the job postings into a pandas dataframe.
- **Proxy support:** Supports the use of proxies to bypass blocking.

## Use Case

This package serves as a backup and viable option for scraping job postings for our use case. It provides a comprehensive solution for aggregating job postings from multiple sources, ensuring that we have access to a wide range of job opportunities.
